## Tic tac toe strategy pick 3

Here we have Lottery Pick 3 (Tic Tac Toe Strategy) One of the oldest Pick 3 lottery systems that has a pretty good hit percentage is 123 training. You will start by using the previous number drawn in the Pick 3 lottery. For the purpose of this pick 3 system we will use 11. Use Select 3 lottery math rule: When adding or subtracting numbers do not carry. Example  $4+8 = 2$  NOT 12 The  $+1+2+3$  First, we will add 123 to each of the numbers  $1+9 = 0$   $2+1 = 3$   $3+4 = 7$  First number = 037 The  $-1-1-1$  Now we will subtract 111 from the number  $9-1 = 8$   $1-1 = 0$   $4-1 = 3$  Second number = 207 The  $+2+3+5$  Now we're going to add 235 in number  $2+9 = 1$   $3+1 = 4$   $5+4 = 9$  Third number = 149 Now stack each of the numbers to get: 037 803 149 Finally, use the Tic Tac Toe (TTT) method to come up with your numbers. Called Tic Tac Toe because it looks like a TTT board. Draw your patterns Tic Tac Toe numbers are: Patterns Combinations Found Over 037 - 803 - 149 Down 081 - 304 - 739 Diagonal 003 - 107 Diamond 384 - 334 Half Diamond 009 - 701 Corners 803 - 814 - 373 - 394 H Pattern 080 - 180 - 730 - 930 Crossing 803 - 804 - 303 - 304 Remove doubles and repeats, and you have the following 10 box combinations: 037, 803, 081, 304, 739, 107, 384, 814, 930, 804.
